Directions - Follow step-by-step to create your own solution.
Try creating variations with different sizes of shapes.

Maria Thomas - Official Zentangle - Tripoli

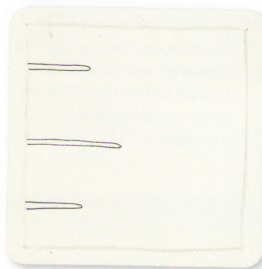

Create several patterns to fill the entire area.

Name _____ Date _____ Per. _____

Directions - Follow step-by-step to create your own solution.
Try creating variations with different sizes of shapes.

1 Create your pencil border on your Zentangle tile.

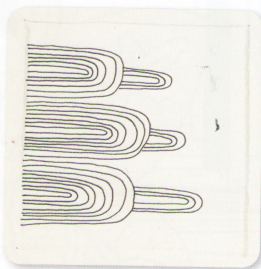

2 Draw 3 long, thin bars in various lengths with rounded edges from one side of the tile. In the example, I have chosen to draw left to right, but there is no reason you cannot adapt this to any direction.

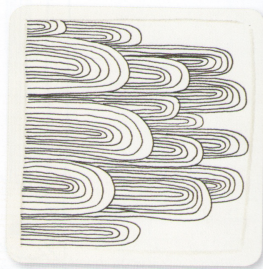

3 Draw another fine line around each bar, doubling the bar. Your bars will become wider and rounder at the ends as you add more lines.

4 Continue to add more lines until each wave meets up.

5 Once each wave has connected, start a new wave on the end of the existing waves. These, too, should be various lengths.

6 Continue building new waves at various heights until you feel that the waves are complete.

Kass Hall - Five-Oh

A large rectangular area with rounded corners, intended for drawing. It contains three horizontal bars on the left side, each with rounded ends, and the rest of the area is blank for drawing.

Fill the entire area.

Example

Directions - Be inspired by the example.
Create your version of this design. Create
variation by altering the size or shapes of
the objects.

A large, empty rectangular box with rounded corners, outlined by a double black border, intended for the student to create their own version of the design.
