

# Photo Swap Rubric

1 pt.	3 Pts.	5 Pts.
The head was poorly cut out.	The background for the head was eliminated but was missing a 2 px blurred edge. The artist paid <b>some</b> attention to the details around the head.	The background for the head was completely eliminated and has a 2 px blurred edge. The artist paid <b>close</b> attention to all the details around the head.
The animal features were poorly placed, not well selected and were unconvincingly placed.	Some of the animal features were selected with blurred edge, but lacked convincing evidence that the features faded in to the face.	The animal features were selected with blurred edge between 9 and 20 px., so the edge faded perfectly into the features of the face.
No warping tool was used.	The artist used the warp tool to reshape 1 of the animal features.	The artist used the warping tool to reshape the ALL the features of the animal.
No eraser tool was used.	The artist used the eraser tool, but the edges are still unevenly blended.	The artist used the eraser tool to perfectly blend the animal features into the head.
The project lacks a background layer.	<p>The background is not properly sized.</p> <p>The creature is not properly placed in the background environment.</p> <p>The background is inappropriate or unreadable.</p>	The artist placed a background that added visual clues about what the creature does, or where the creature lives. The background is properly sized and the character is positioned in a convincing position. i.e. not floating in air.
