Always begin your building by drawing the front edge of the building.

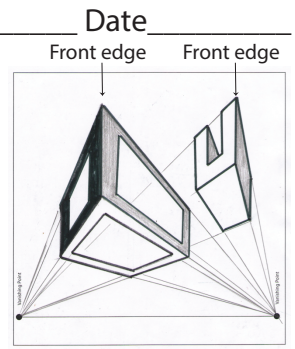

Add windows and doors.

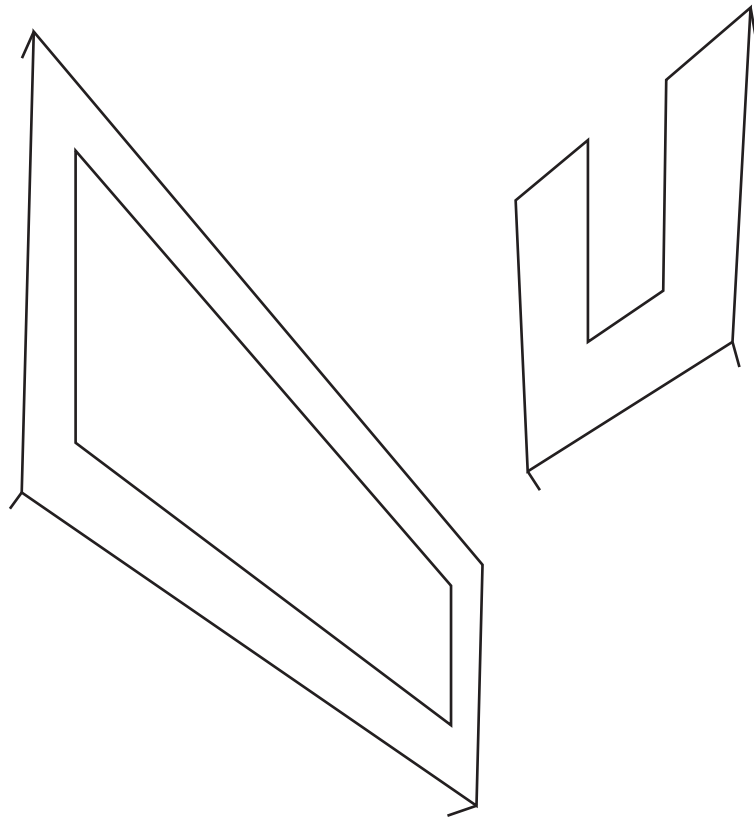

Low Horizon Line

Experiment with creating new shapes.

Become aware of how a very low horizon line effects the shapes.

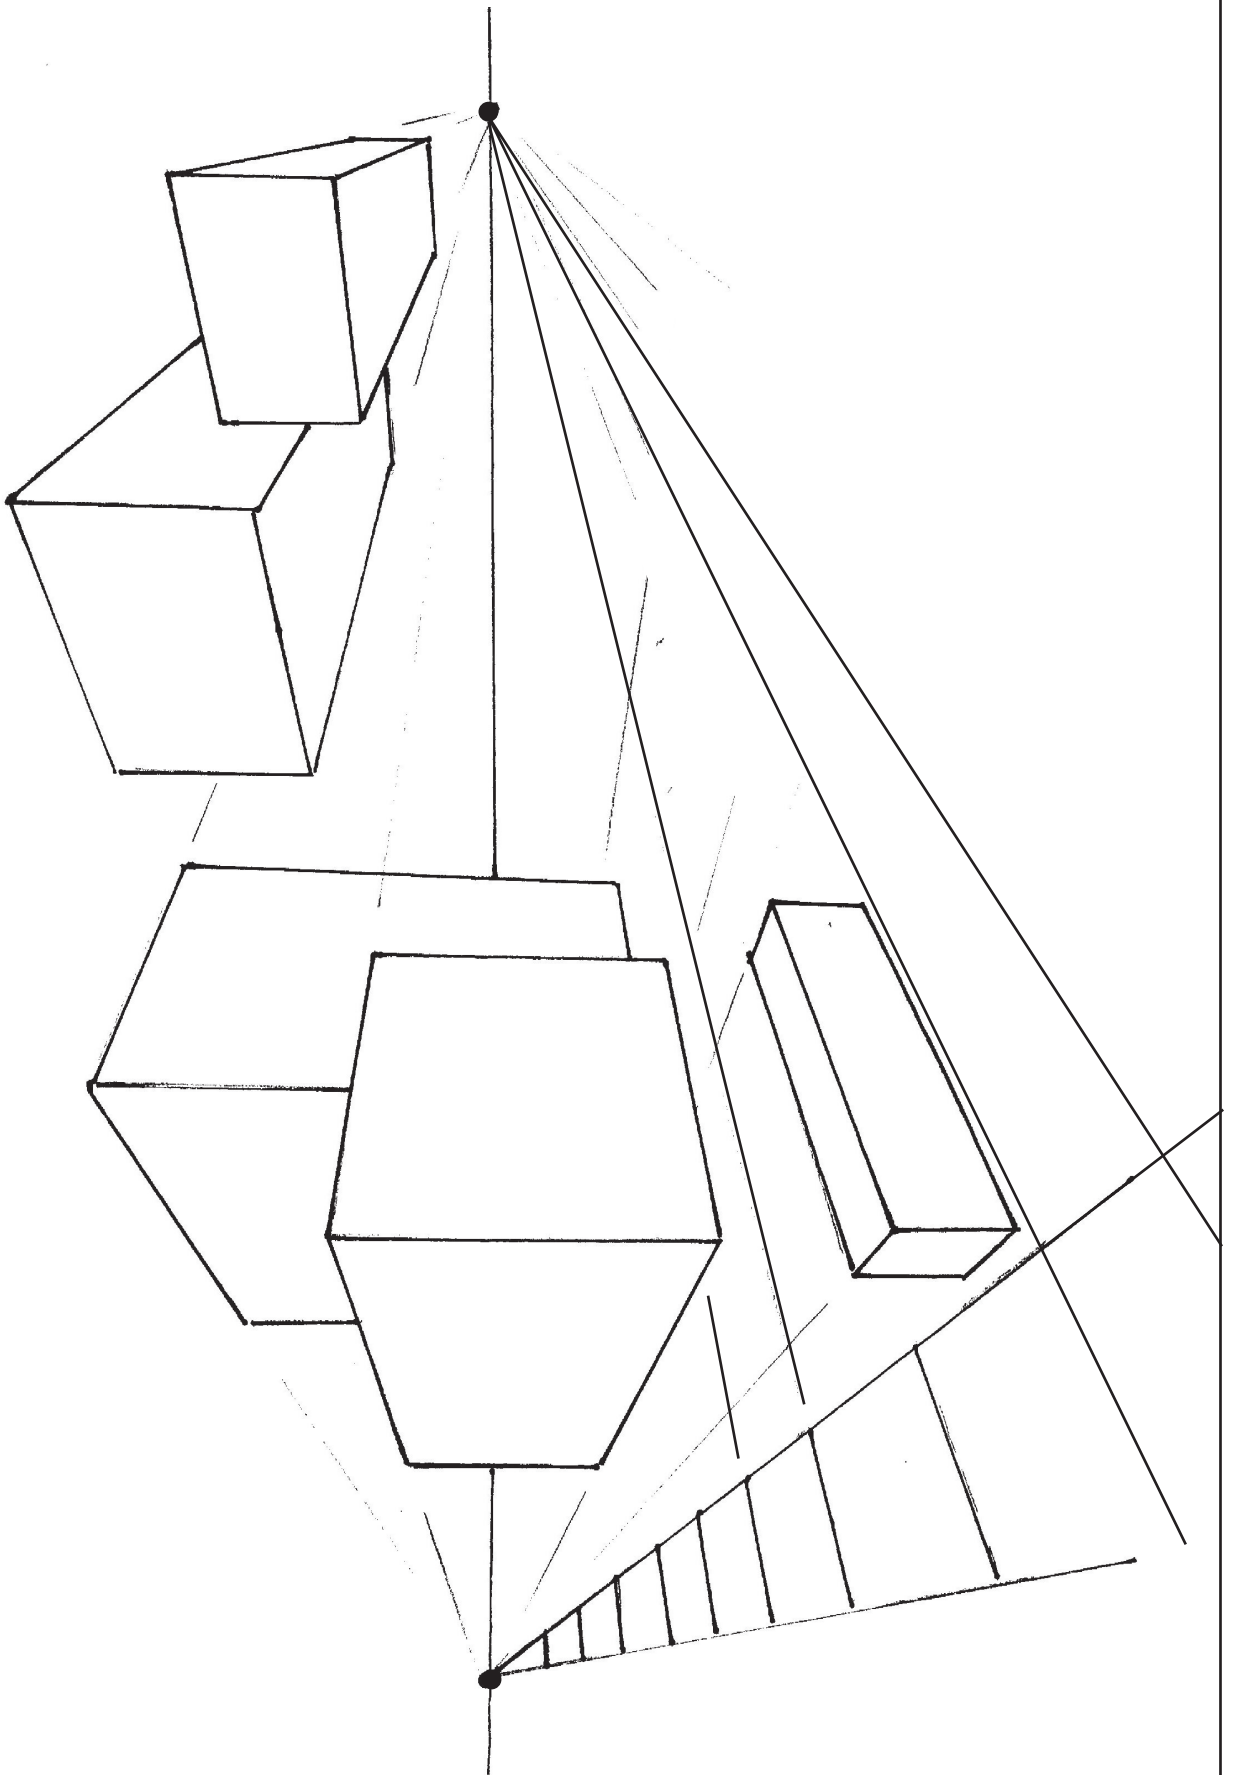

Begin by drawing a line that represents the Front edge of the shape.

Vanishing Point

Vanishing Point

Directions: Do your best to recreate this drawing. Two-point perspective.

Tear off this page. Recreate the image on the next page.

Name: _____ Last Name: _____ Per. _____ Date _____

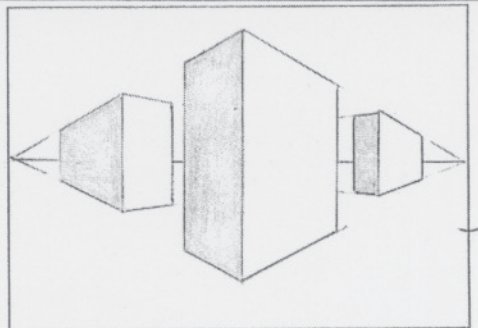

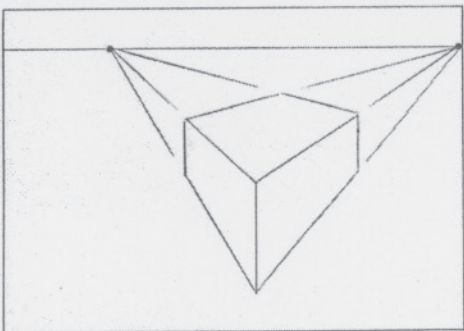

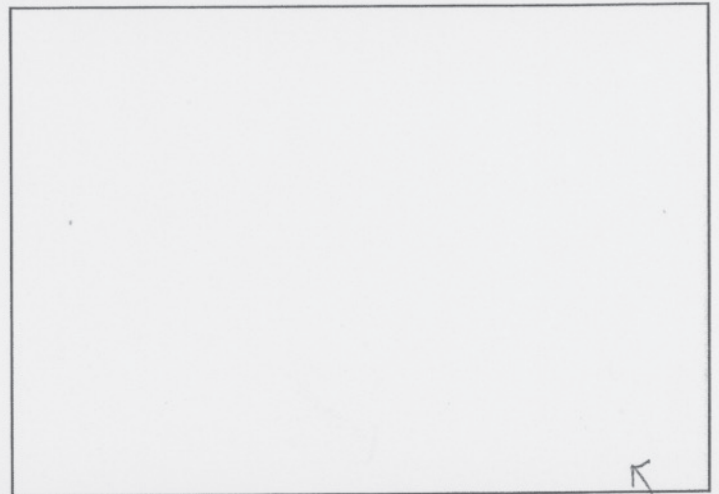

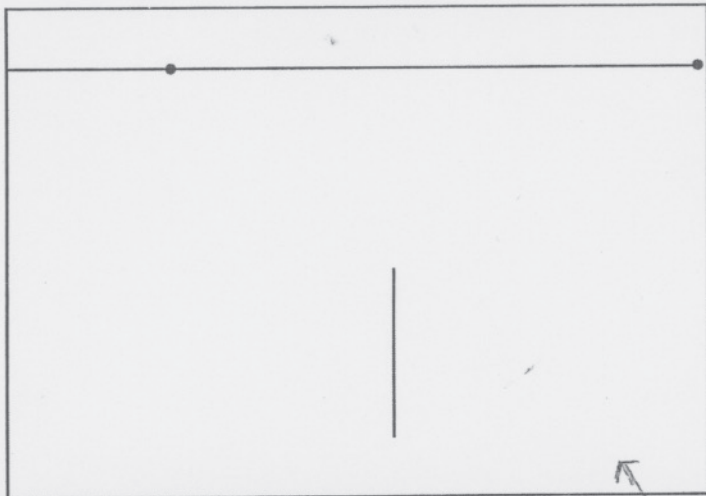

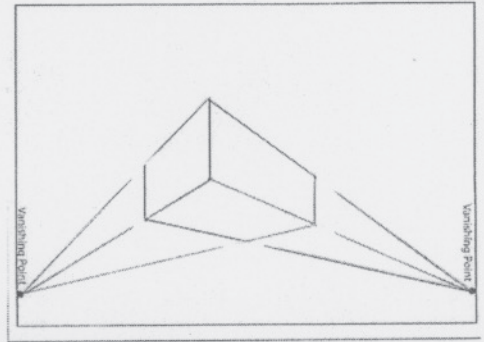

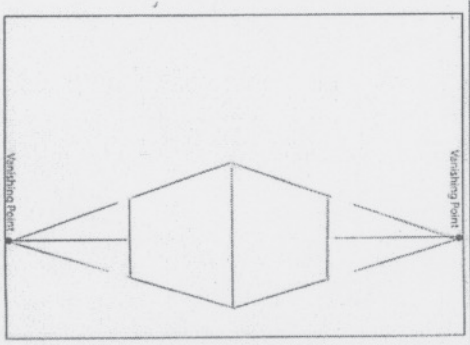

Recreate the image on the previous page.

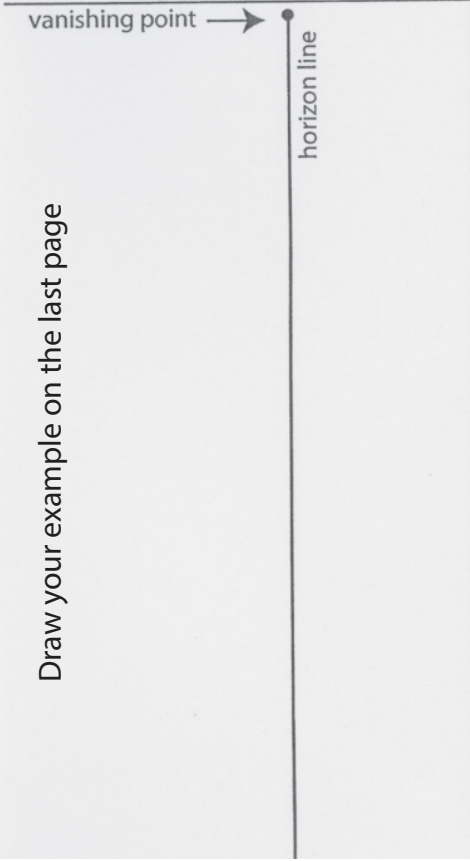

The front edge of all the shapes have been provided to help you begin your drawings.

Name: _____ Per. _____

Recreate these 4 drawings. Explore high or low horizon lines.

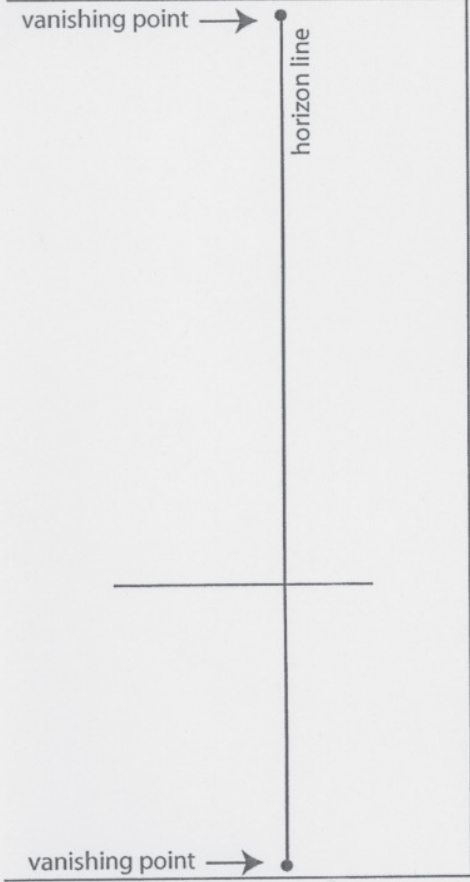

Draw your example on the last page

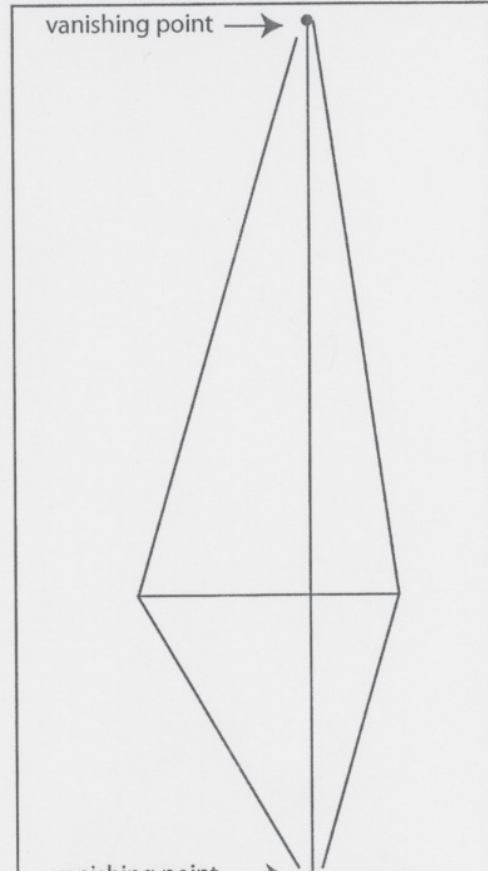

Step 1: Draw a horizon line.

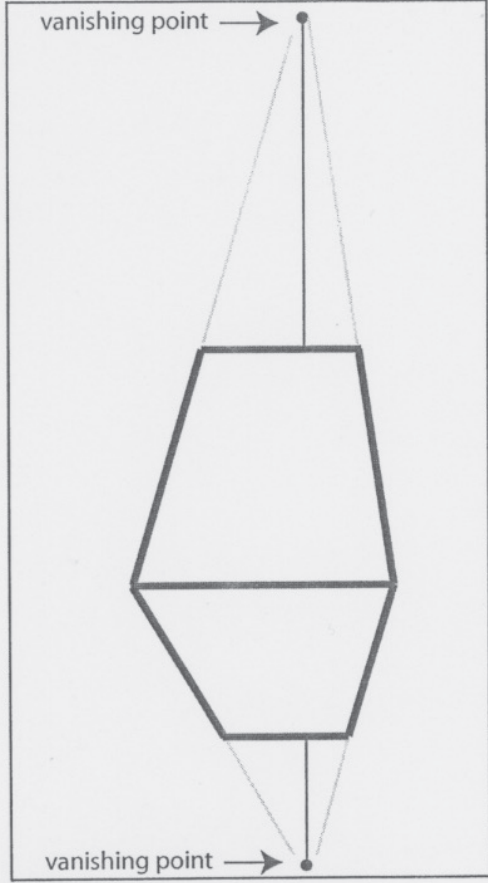

Step 2: Place a vanishing point on the right side and one on the left.

Step 3: Draw a vertical line the starts below the horizon and ends above the horizon.

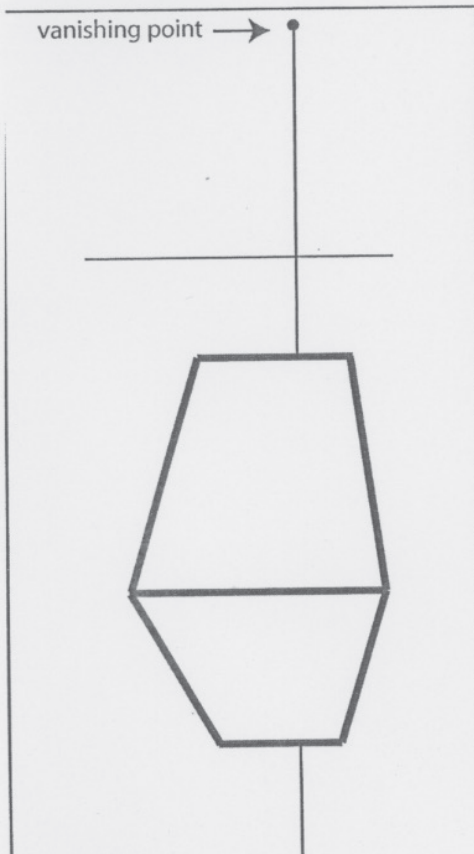

Step 4: Connect the top and the bottom of the line back to the vanishing points.

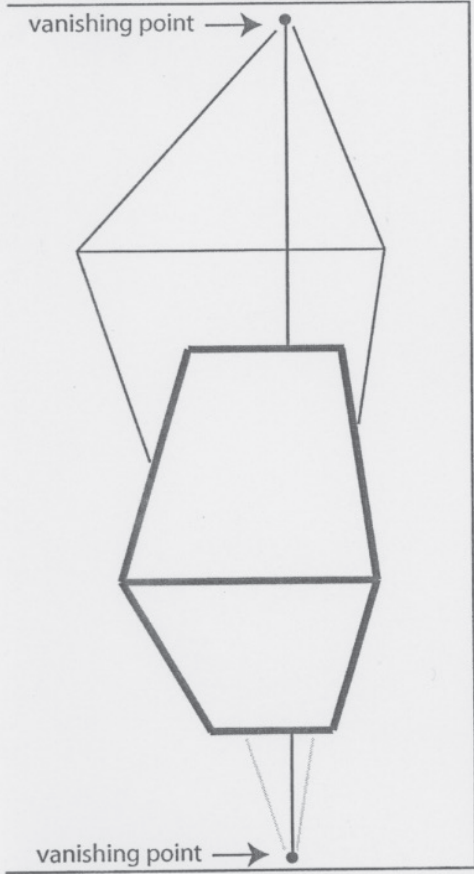

Step 5: Use a vertical line the is parallel to the center line to trim off the sides of your shape.

Step 6: Erase the construction lines and the horizon line that is behind the shape.

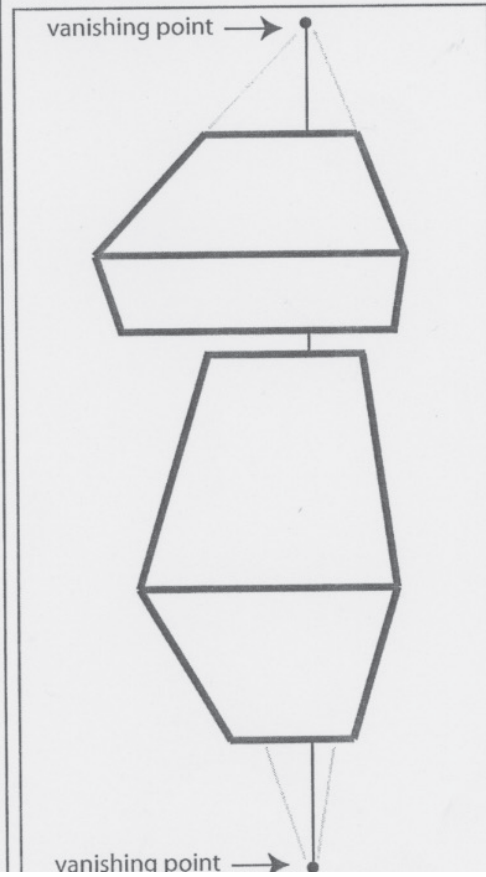

Step 7: To add another shape, begin with another vertical line.

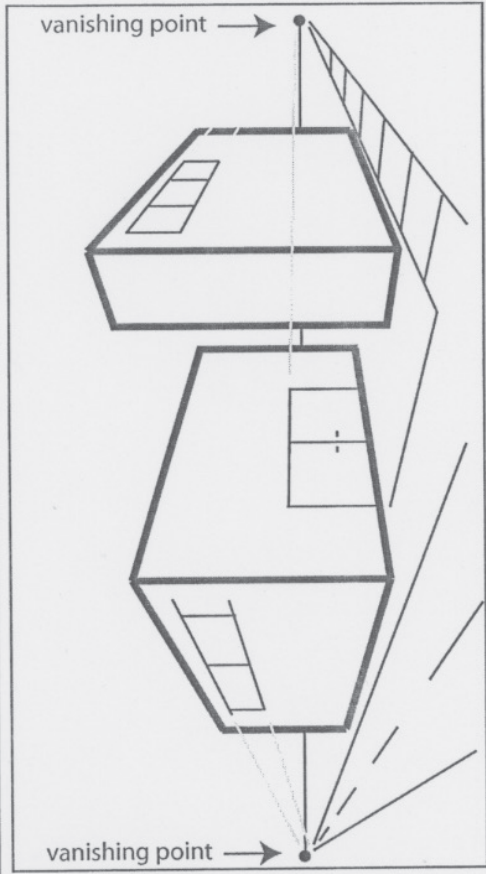

Step 8: Connect the top and the bottom of the line back to the vanishing points.

Attention: When a line hits the shape next to it STOP, do not draw over the top of the other shape.

Step 9: Use a vertical line the is parallel to the center line to trim off the sides of your shape.

Step 10: Erase the construction lines and the horizon line that is behind the shape.

Tips and Tricks: Road and sidewalks will also go back to the vanishing point.

The lines on the sidewalk go back to the vanishing point on the opposite side.
