

Radial Balance Learning Activity

Example

Directions -

1. Use tracing paper to copy the design.
2. Flip the tracing paper face down, and align it into the matrix above.
3. You may use a piece of tape to hold your tracing paper in place.
4. Use a dull pencil to draw on the backside of the tracing paper. Press hard to transfer the design into the matrix.

5.- For the next triangle, you will need to **flip** the tracing paper over and retrace. Connect your shapes like the example above.
