1 Point Perspective

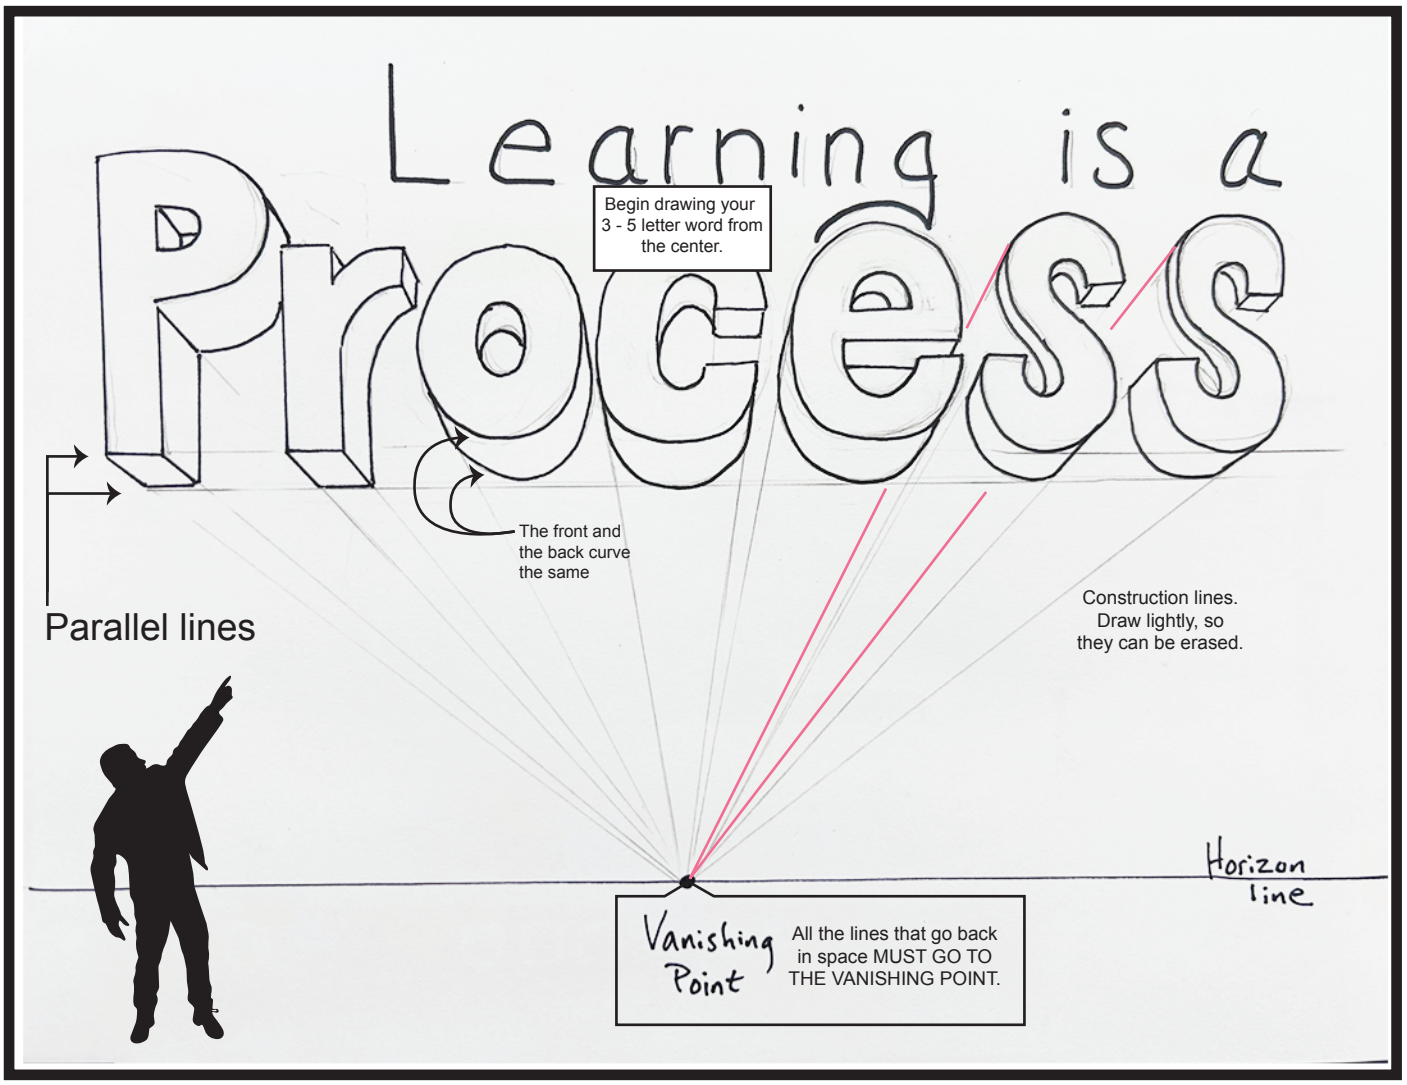

Space is an Element of Art

RULE 1. Use a **horizon line** to represent the level of your eye. The horizon shows where the ground meets the sky.

RULE 2. The **Vanishing Point** must be on the horizon line.
ALL THE LINES THAT GO BACK IN SPACE MUST GO TO THE VANISHING POINT.

RULE 3. Use **parallel lines** (lines that are the same distance apart, and will never cross.)
The front edge of the shape will be parallel to the back edge.
If the shape curves in the front, the back edge will curve the same.

DIRECTIONS - Draw a 3-5 letter word in block or bubble letters. Create 1-point perspective. Finish the drawing with an element of art we have studied, such as line, value, color, texture, pattern, etc.

One Point Perspective Examples
