Directions - Recreate the example shown below.

Step 1 - Use the shape tool, and the pen to copy the exact size of the circles and lines shown below. Trace over the example.

Step 2 - Drag the shapes and lines to the right as your Student Solution. Use the Shape Builder tool to combine shapes. Use the direct select tool (a) to remove the shapes from the background. Delete the extra stuff.

Step 3 - Create three different versions using color, shape, and/or effect.

Student Solution
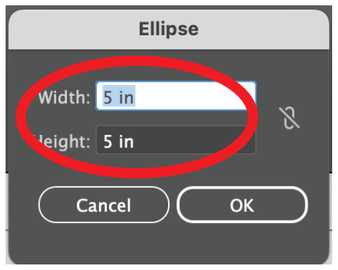
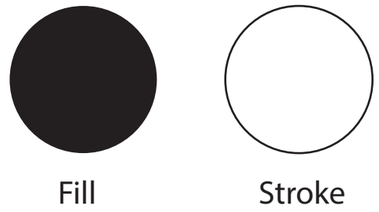
Version #3

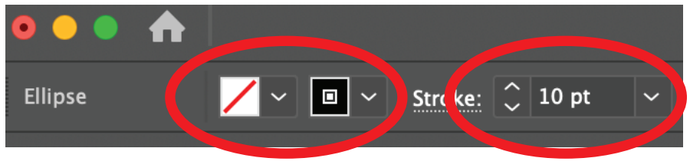
Directions - Recreate the example shown below.

Step 1 - Press L on the keyboard (ellipse tool), click anywhere. A menu will open set the size to 5” x 5”. Change the Fill color into a stroke.

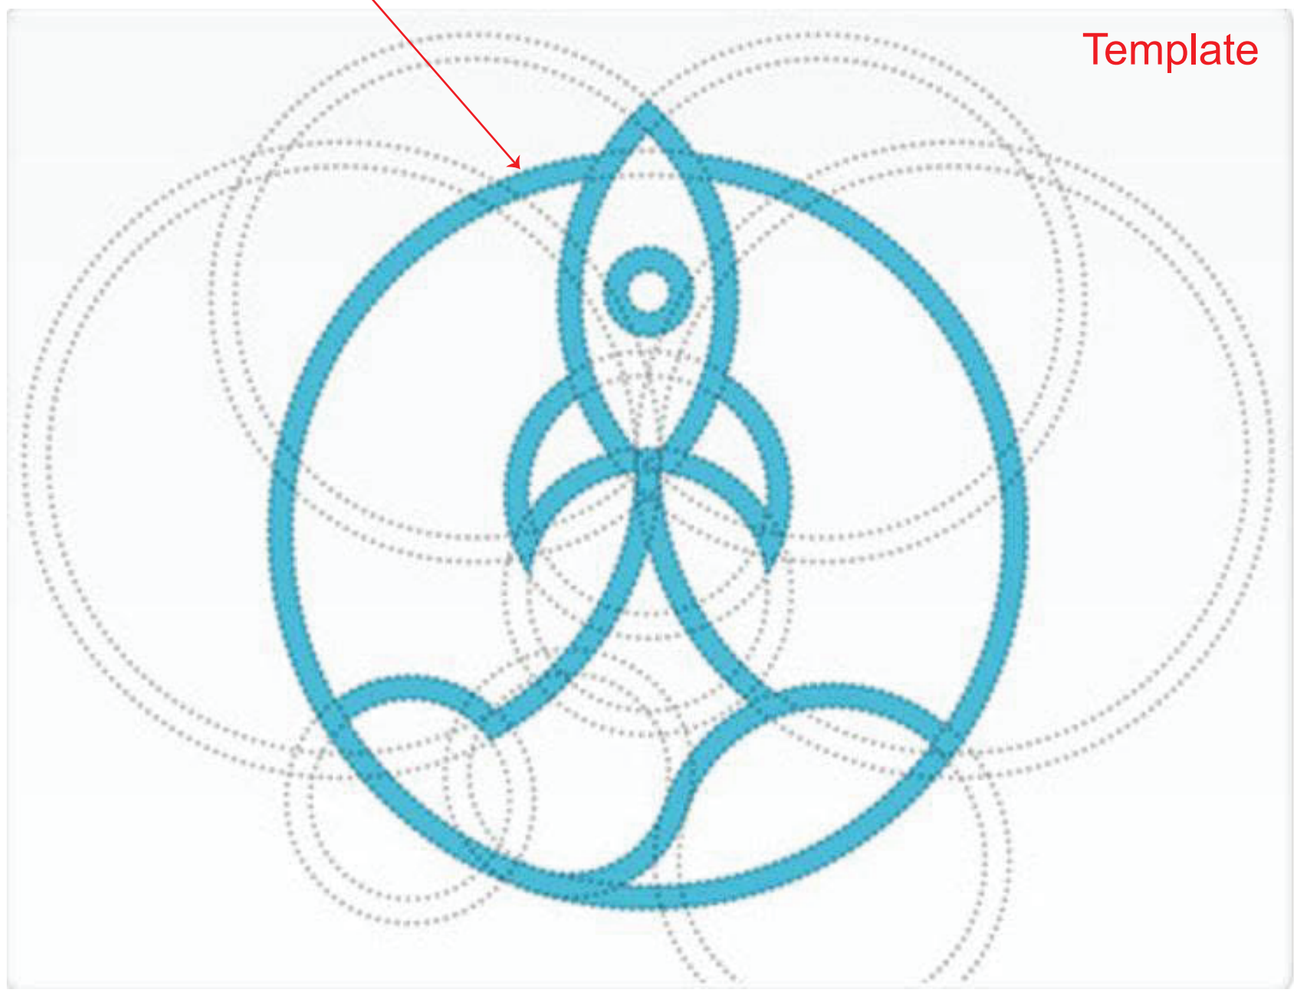




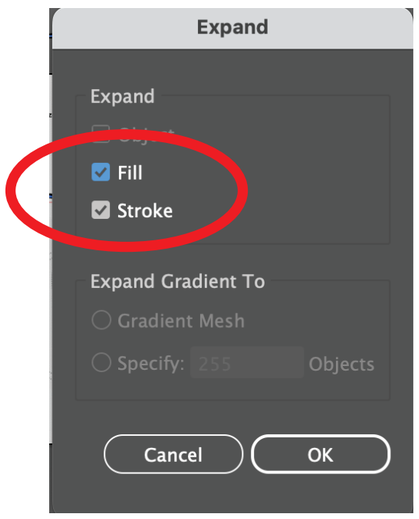
Step 2 - Set the weight of the stroke to 10pt. This first circle is the largest, outside circle.



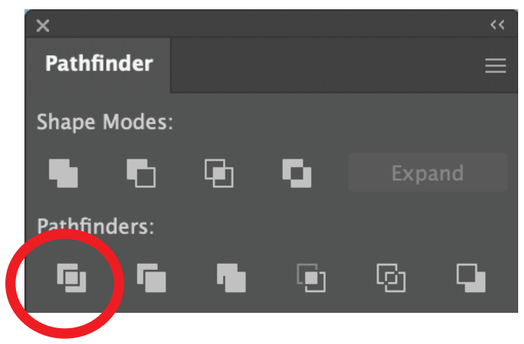
Step 3 - Continue adding the remaining circles over the example of the template. Make sure all your circles are 10pt width.



Step 4 - Once you have all the circles layout exactly over the template, Object > Expand



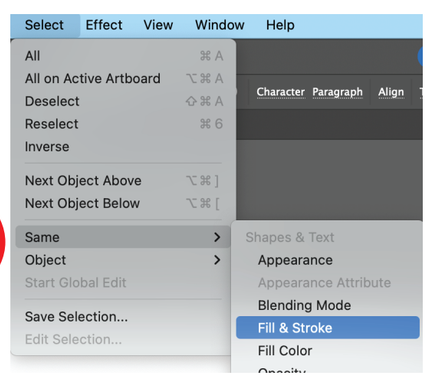
Step 5 - Window > Pathfinder >Divide. This will break your design into a lot of tiny pieces.

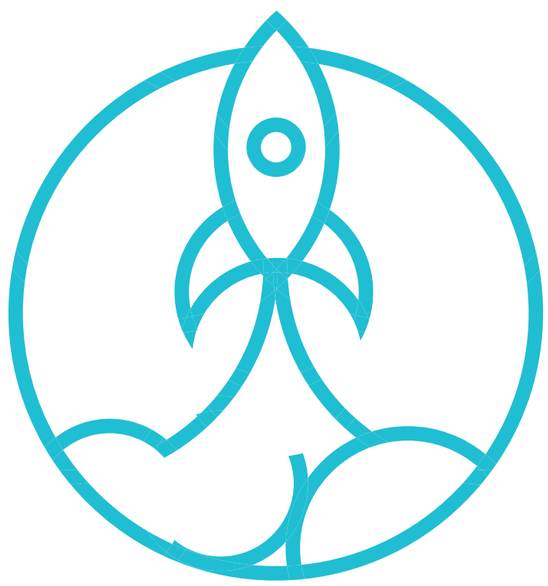


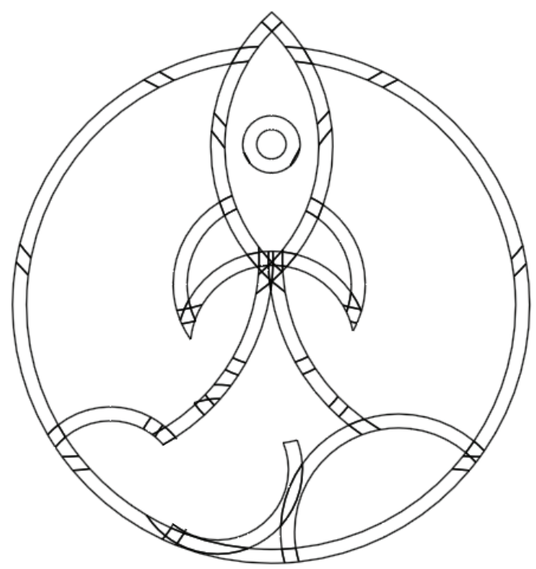
Step 6- Object > Ungroup

Step 7 - Delete all the pieces that you don’t need anymore.

PRO TIP - If you happen to select a shape with no fill and no stroke color; go to Select > Same > Fill and Stroke. Delete all the invisible shapes.







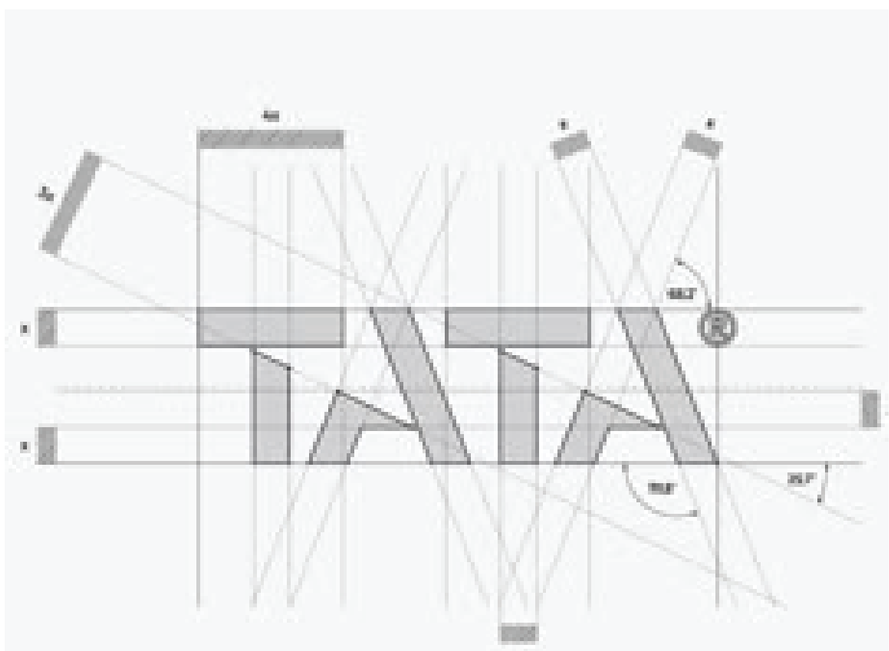
Student Solution

Directions -
Step 1 - Create a group of overlapping shapes and lines to design a personalize logo (letter-forms.)

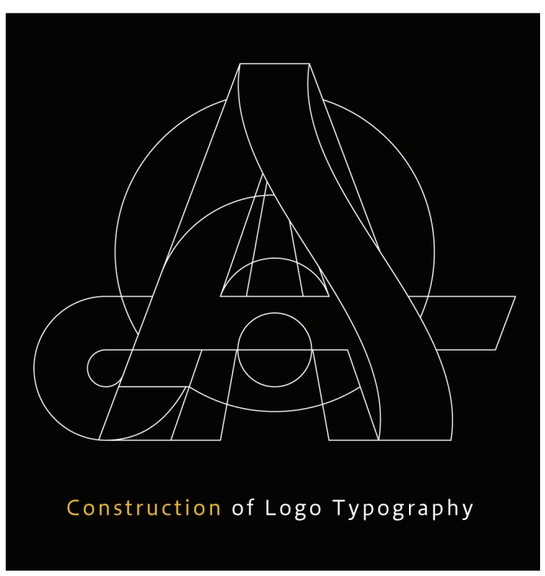
Step 2 - Use the shape builder tool (shift M) to combine the shapes into your letter-form.

Step 3 - Use the direct select tool (a) to select your shape and remove them from the matrix. Delete the unwanted stuff.

Step 4 - Apply color, effects, etc.



Examples



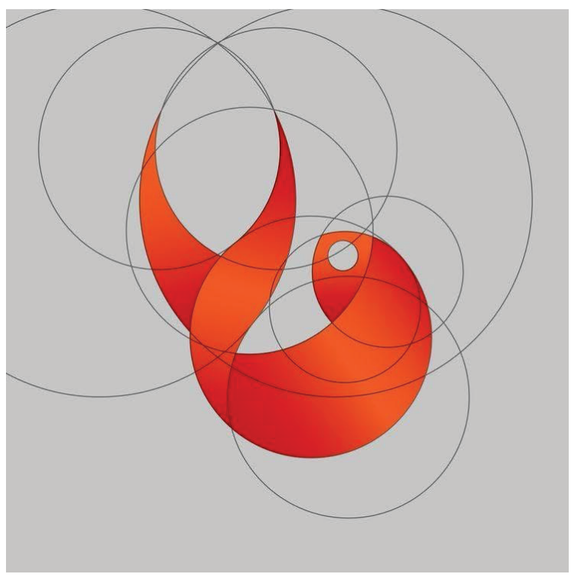
Directions -
Step 1 - Create a group of overlapping shapes and lines to design a Branding Mark (Shapes)

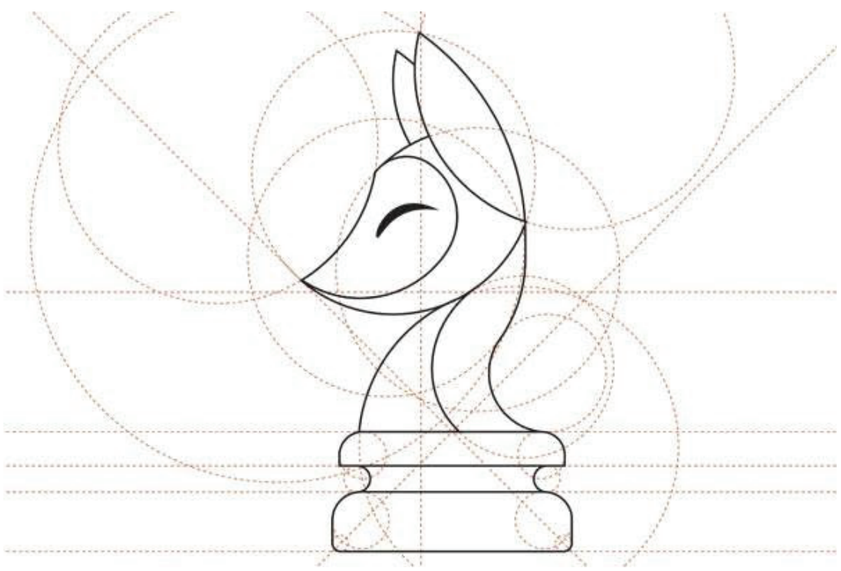
Step 2 - Use the shape builder tool (shift M) to combine the shapes into your Branding Mark.

Step 3 - Use the direct select tool (a) to select your shape and remove them from the matrix. Delete the unwanted stuff.

Step 4 - Apply color, effects, etc.

Examples





Directions - Copy and paste your logo and mark onto this page. Combine your logo and mark together. Shapes, and lines can be used to help combine the ideas.

Create 3 solutions

Explore color and effect IF you want.
