About me / Inspiration

You do not need to create a gallery.

Just Add to page.

I currently have one cat. I find cats interesting because they are essentially the same genetically as they were back in ancient Egypt. To me the cat is a wild animal that lives among humans. The reason I like cats is, all you have to do is feed them and they are find. Dogs require too much work.

Each of your 5 items about you should have an image and a paragraph to explain why this is important to you.
